

Lee Scott

Lead Control Systems Engineer

Hire-A-Vet Spotlight!

What is Lee's Military Background?

Lee served for four years in the U.S. Air Force as a member of the Security Forces, supporting the protection of personnel, resources, and military installations.

Which skills from your military service have helped you succeed?

"Leadership and the ability to perform well under pressure have helped me succeed throughout my career. My military experience taught me to remain focused, make sound decisions, and work effectively with others in challenging situations."

What advice would you give another veteran considering a career in the industry?

"Don't let a lack of control systems education or experience hold you back. Most learning happens on the job, and it takes time to get up to speed. The leadership skills and ability to perform under pressure gained through military service provide a strong foundation for success."

What attracted you to Thermo Systems?

"I had heard many positive things about Thermo's culture and dedication to delivering high-quality work - two things I greatly value. The company's strong reputation and commitment to excellence made it an organization I wanted to join."
